

Welcome! to our 3rd quarterly newsletter, we have a lot to share.

As the days get longer, the trees blossom and the cool winds slowly turn to warm we approach the end of 2024. It has been a mixed bag this year. Just like the equinox, the economic winds certainly have been blowing and certain sectors are still feeling the pinch. Shout out to all the farmers and primary produces out there who put the work in day in day out - you are HB's heroes. We have completed several awesome projects over the winter and into spring, and it's hard to believe we are already trying to arrange winding down for Christmas! This summer looks to be a hot one, remember book in your dam cleaning, farm maintenance and drainage projects while the ground has dried up!

We are working hard developing our yard at 110 Mere Road, Fernhill, renovating office and workshop spaces to accommodate our growing business. The new year should see at least some fulltime office staff setup onsite.

Enjoy the Read!

Product Spotlight

Underfloor Fill (AP20)

One of our originally blended products, underfloor fill is a very affordable base prep for paths, driveways and patios. Blended to create an easy working, compactable mix. 20mm and down in size, it is a blend of river stones, sand and silt. Pick some up, or sing out and we can get it delivered to you.

"Fresh off the press!"

Take a look at our brand-new services brochure and feel free to share the link between friends and family.

Some people may be unaware of just how many services we offer other than drainage and supplying aggregate. We aim to spread the word best we can!

New Topsoil Bunker

No more waiting for the sun to come out to access dry topsoil! We now store our 10mm Screened Topsoil product undercover so when the rain comes, it doesn't spoil it. Our new cover, installed at Mere Rd yard, will ensure you have access to high-quality DRY topsoil whenever you need it.

FAQs

How much time do you need to order a truckload of aggregate? 2-3 hours for 1 or 2 truckloads is usually fine. However, book in early as you can, particularly for larger projects, to ensure your project doesn't get held up because our trucks are busy elsewhere!

Are you open on weekends? No, our yards are open from 6am - 5pm Mon - Fri.

Can you truck other suppliers products? Absolutely, we can cart anything anywhere. We once carted snow from the Kaweka's to a preschool for the kids to play with. Awesome!

Do you have testing reports available on your aggregates? Yes, we have MDD and PSD tests done on our most common products, contact us to request paperwork.

What is the smallest quantity I can order for delivery? You can order as little as you like, but keep in mind our large trucks (payload 11-12 tons) still need to make the trip so small amounts can end up quite expensive. It often works out best to come and pick up a trailer load if you're only needing a small amount.
